

Albert Hilazo Aguilera.

FULL-STACK SOFTWARE ENGINEER · TEAM LEAD

A full-stack software engineer with a wide background of roles and environments; always with a strong interest in the related best practices, able to work on all levels of an application and enabling growth of other team members. Currently leading a team while staying close to engineering practice.

PROFESSIONAL EXPERIENCE

BioCatch

Banking cybersecurity · software engineering · Barcelona

- Team Lead** Jan 2026 – Present
 - Grew a team from 3 to 9 members across management, principal engineering, and development roles, with 4 direct reports.
 - Led a 10-person cross-team squad for one of the company's main projects, drawing engineers from two teams across development, data engineering, and DevOps disciplines.
 - Designed and introduced team methodologies for AI-assisted software delivery, translating early AI agent adoption into structured team practices that surface unknowns early and make implementation timelines predictable.

People management, Hiring & team growth, Cross-team coordination, Delivery planning, Stakeholder alignment, AI-assisted delivery, Engineering methodology
- Technical Lead** Apr 2025 – Dec 2025
 - Led the technical direction of a business-critical project, defining strategic initiatives, aligning the team around a shared engineering vision, and providing hands-on guidance throughout implementation.
 - Introduced an Epic Owner model, coaching developers through end-to-end feature ownership, from scope negotiation and requirements refinement to solution design and delivery, while maintaining accountability for outcomes, reducing bottlenecks and driving faster, more autonomous development cycles.
 - Implemented an Observability strategy from scratch, defining minimum required monitoring data, establishing collection and processing best practices, and enabling efficient alerting and troubleshooting workflows.

Technical strategy, Engineering vision, Developer coaching, Observability, Requirements negotiation, Epic ownership model
- Senior Full Stack Developer** Nov 2023 – Mar 2025
 - Initiated a new fraud analysis platform, designing the full architecture to prioritize rapid development and scalability for an MVP.

- Designed and implemented a micro-frontends architecture as a first for the team, establishing guidelines for addressing the project's socio-technical requirements through it.
- Built features for the early stages of an ambitious project, ensuring adaptability to evolving requirements and potential changes in direction.
- Drove improvements in working practices, including managing code complexity, raising test quality standards, and streamlining development cycles.

PROFESSIONAL EXPERIENCE – CONTINUED

Thoughtworks

Technology consultancy · Barcelona

- **Senior Consultant Developer** Jan 2023 – Oct 2023
Medical innovation company

- Built a scalable data processing platform from the ground up using Infrastructure as Code and serverless cloud services, enabling seamless deployment across multiple regions and global customer access.
- Developed a data visualization web application that processed data from medical IoT devices transmitting multiple data points per second and presented it for analysis aggregated at various scales.

TypeScript, Node.js, React.js, GraphQL, Python, Pandas, AWS CDK, GitHub Actions

- **Technical Lead** Mar 2021 – Dec 2022
Energy market company

- Led the technical direction of a six-person team and fostered the professional development of its members, increasing their involvement in backlog refinement and mitigating knowledge silos.
- Designed and developed a flexible workflow for data manipulation processes, enabling the seamless addition and removal of experimental features without compromising the user experience.

JavaScript, Vue.js, Java, Spring Boot, Python, Pandas, AirFlow, AWS, Terraform, Datadog, Jenkins

- **Site Reliability Engineer** Nov 2018 – Feb 2021
Online car marketplace

Kubernetes, Elasticsearch, Datadog, AWS CloudFormation, AWS CDK, Python, JavaScript, Jenkins

- **Consultant Developer** Feb 2018 – Oct 2018
European Commission project

JavaScript, React Native, Expo, Python, FastAPI, AWS, Docker

CAPSiDE · Barcelona

- **Software Engineer** Jan 2016 – Jan 2018

La Salle Campus · Barcelona

- **Adjunct Lecturer** Oct 2015 – Feb 2016

- **Teaching Assistant** Sep 2012 – Sep 2015

T-Systems Iberia · Barcelona
